DETAILED ACTION

Specification

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

2. Claim 20 is objected to because of the following informalities: "WLAN" is suggested to be defined. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7-10 and 13-31 recite the limitation "said balanced modulator" in claim 7. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2634

Allowable Subject Matter

5. Claims 1-4 and 6 allowable over prior art references because related references do not disclose a transmitter for upconverting a baseband signal comprising: a first switch for sampling a non-inverted baseband signal according to a control signal; a second switch for sampling an inverted baseband signal according to a control signal; and combining the first sampled signal and the second sampled signal.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yatsuka (U. S. Patent No. 5, 834, 979) discloses first and second samplers and combining the output of first and second samplers.
